Seal for 8

Hand hygiene is the most effective way to prevent the spread of germs. It is a simple but powerful tool that can save lives. Regular handwashing with soap and water for at least 20 seconds can significantly reduce the risk of infection. This is especially important in healthcare settings, where the spread of antibiotic-resistant bacteria is a major concern.

Hand hygiene is a key component of infection control. It helps to break the chain of infection by removing germs from the hands. This is crucial for preventing the spread of diseases like influenza, norovirus, and COVID-19. In healthcare, proper hand hygiene is essential for protecting patients and healthcare workers alike. It is a simple step that can have a big impact on public health.

Hand hygiene is a simple but powerful tool that can save lives. It is a key component of infection control. Clean Air Act Section 12 (40 CFR 85.371).

This product does not contain any of the following substances:

Lead (Pb) as Pb

Mercury (Hg) as Hg

Hexavalent Chromium (Cr(VI))

Asbestos (As) as As, Lead (Pb) as Pb, Cadmium (Cd) as Cd, Hexavalent Chromium (Cr(VI)) as Cr(VI), Polychlorinated Biphenyls (PCBs) as PCBs, Polycyclic Aromatic Hydrocarbons (PAHs) as PAHs, and Phthalates as Phthalates under the Clean Air Act, Section 311, Title 40, Chapter I, Subchapter D, Part 85, Subpart B.

# Soakaway

Material	Volume (m³)	Weight (kN)
Gravel	0.01238	0.12
Water	7732.185	76.97

Soakaway structure details and dimensions.

Additional information and notes regarding the soakaway design and construction.
